

SUMMARY OF EVENT RESULTS

Thank you all very much for participating and showing up on a rather cool day after our cold snap.

Congratulations to Tamara van Lieshout for an amazing 26 points in the Weekend Warrior category.!

And also to Sarah Mitchell for getting 19 controls as a Walker!

I hope you all enjoyed some of the locations and questions (I did get a bit of flack for having too many "biology related" queries)!

The trickiest location which many got wrong was the Esquimalt Plaza sculpture named "Waves", there was another larger sculpture further north in the plaza but was not in the centre of the circle.

Points have been awarded for answers which were not exact but where the participant took a photo or was obvious they had been to that location

A couple of runners were just one minute late but had been held up by an over-zealous security guard at the RV park so no points have been deducted.

Also, almost all 35-40 orienteers finished between 89 and 90 minutes and most did not run direct to my location so I could not accurately time entrants.

That was great timing and planning by all of you!

The results below are listed as to Walker, Weekend Warrior and Runner categories.
